

DL-60

POWERED BRUSH CLEANER

Advanced, Programmable Cleaner is proven effective for improving the performance and cleanliness of all I-Beam Power Monorails.

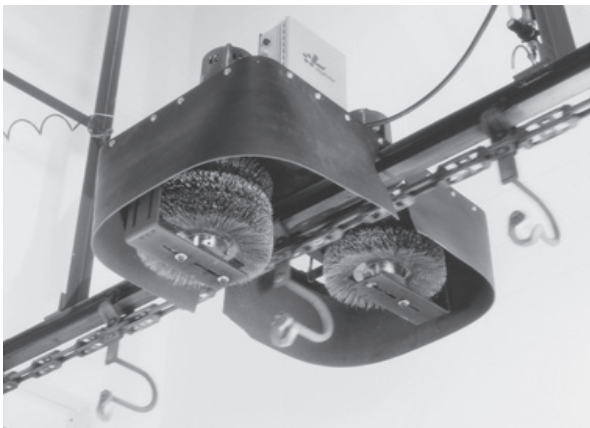

The DL-60 Power Brush Cleaner is designed to remove and prevent the build-up of paint, dirt, scale, rust, oxidized lubricant on 2", 3", 4" or 6" Monorail I-Beam Conveyors chain, pin and trolley bearings.

Twin gear motors rotate 8"-12" diameter brushes, 60 rpm's on each side of the conveyors chain and trolleys. A programmable LED clock regulates the cleaning cycles to effectively keep that particular conveyor clean, thus eliminating product contamination.

The DL-60-E is a modified version designed to clean Enclosed Track Conveyors.

Inquire About Our Complete Line Of Lubrication Equipment, Conveyor Lubricants And Cleaning Equipment.

SPECIFICATIONS

- Two standard reversing motors (each 1/3 hp, 120V, 60 cycles) maximize brush life
- The programmable timer is easy to use; you can program in up to 8 complete cleaning cycles per day, however most systems can be kept clean with a single cleaning once a week or less
- Rugged-duty system is easy to install
- Heavy-duty bearings are self-aligning, shielded and sealed for maximum service life.
- The rubber curtain design contains and directs debris into the collection pan
- Dimensions: 35 1/2" x 22" x 30" (height can vary)
