

## RESTART QUICK GUIDE

RESTARTING YOUR MANUFACTURING PROCESSES AFTER MONTHS OF SITTING IDLE MAY SEEM DAUNTING, BUT DIGILUBE'S **AUTOMATIC LUBRICATING SYSTEMS** IS ONE PART OF THE PROCESS THAT WON'T BE STRESSFUL.

OUR RESTART QUICK GUIDE WILL HELP YOU GET YOUR LINES BACK TO FULL CAPACITY WITHOUT A MAJOR BREAKDOWN DUE TO POOR LUBRICATION.

- If you have rust on your chains / trolleys from inactivity, run a **Normal Cycle** with the settings you have programmed.
  - » If rust remains, run a **Force Lube Cycle**.
- Running at a lower capacity than normal? You may need to adjust cycles and programming. Call Digilube Service for assistance on determining the best cycle.
- Service Techs are available directly by phone. Not sure who the service tech is for your area? No problem, call our Customer Service line and we can direct your call.
- Manuals and Brochures available online 24/7

**FOR SERVICE, CALL (937) 748-2209**
