

# DL-5004 HEAD CONTROLLER

Introducing our new microprocessor with advanced technology paired with intuitive user interface design. Ideal for a wide range of applications, the DL-5004 sets a new standard in control systems, ensuring reliability and performance excellence.

## STATE OF THE ART USER INTERFACE

- **Lube Level Switch:** Detects Lube Level in Tank
- **Tank Pressure Switch:** Detects low-pressure events
- **Lube Leakage Detection:** Ability to turn off the pump immediately
- 2 Optional Modes
  1. Stand-Alone: simpler systems
  2. Daisy-Chained: more complex systems, up to 13 controllers
- **System Light Indicators:** Give clear feedback about the general status of the system
- 4 Light Outputs
  - Power On, Pump On, Out of Lube, Flow Alarm
- **8" Color Touchscreen** - Features include:
  - Valve status
  - Discrete input & output status
  - Lube usage
  - Failure details (broken valve coil, others)
  - Lube pump status
  - Tank pressure status
  - Tank level status
